THIS IS UNEVALUATED INFORMATION

	locomotives available in the Soviet
Zone of Germany on 30 November 1950	

The park of locomotives owned by the State Railroads has increased by eight units, but the number of serviceable locomotives has decreased by 32, a fact which indicates a deterioration in repair and maintenance work. The number of damaged locomotives declined by 39 units because of the scrapping of engines now under way.

The total number of column locomotives has remained constant, but the park of serviceable engines has risen by 15. One foreign locomotive seems to have been returned to its country of origin. There was no change in the number of small and narrow-gauge locomotives.
